EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with J. Collett on 9/15/04.

The application has been amended as follows:

In claim 27, line 2, after "a substrate" has been inserted

---glycated protein---

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The application is allowed because no fructosamine oxidase (fructosyl amine oxidase) from a mammalian including a human source is known in the prior art. Further the fructosamine oxidases known from microbial sources are not active on glycated proteins, merely on glycated amino acids. Thus, the invention drawn to the measurement of a mammalian fructosamine oxidase and measurement of the activity of a fructosamine oxidase using a glycated protein as substrate is novel and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
